

LANDSBERG
STEEL PROFILES

TECHNOLOGY INNOVATION QUALITY

100% Polish
company

Manufacturer of a wide range of **steel profiles**, whose various cross-sections and shapes are supplied to many industries in Poland and abroad.

The factory in Wolental in the Province of Pomerania is located near the A1 highway junction, at a distance of 70 km from the sea transshipment ports in Gdynia and Gdansk, as well as from the Lech Walesa international airport.

The **LANDSBERG Group** is committed to the highest standards in business conduct, B2B partnership, production and service for its customers. We focus on dynamics and credibility in our business activities.

+1000 different products

+22 years on the market

The Landsberg Group portfolio continues to grow:

- ✓ steel profiles **LANDSBERG.pl**
- ✓ roofing and façade cladding **STAHLBERG.pl**
- ✓ steel structures for photovoltaic panels **SUNBERG.eu**

Cold forming technology.

Certified products of excellent quality and durability.

of our partners

The factory offers services such as:

- ✓ cutting steel coils
- ✓ perforation and milling
- ✓ laser welding
- ✓ permanent marking of profiles
- ✓ 24/7 production
- ✓ packaging according to customer specifications
- ✓ efficient logistics at home and abroad

During the 20 years of operation new brands have been established and the business profile has been diversified.

The Landsberg Group is characterized by:

- ✓ business credibility
- ✓ sustainable development
- ✓ dynamics and flexibility in operation
- ✓ care for the safety, comfort and development of employees

stable inventory
of steel profiles

quick implementation and production of new, bespoke designs, strictly according to customer specifications

in-house tool room ensures quality and speed of production: CNC lathes, milling machines, saws, laboratory equipment, COPRA™ software

7 profiling lines

2 slitting lines

1 line for folding profiles with thermal bridges

9 lines and machines for profiling STAHLBERG coated sheets

MOUNTING AND STRUT PROFILES

www.landsberg.pl/en/offer/

For lightweight structures for all types of mounting systems, heat pumps, electrical systems, cable tray structures and process lines.

Production lines in the factory equipped with CNC presses and milling machines give unlimited possibilities for making complex hole shapes, be it isolated or repetitive.

WELDED PROFILES

Landsberg Group mounting profiles are used, among others, in internal sewage systems, sanitary and heating installations, water treatment, chimney and fire protection systems, all kinds of cable routes systems, as well as in supporting structures for photovoltaic panels.

Welding is done in line with the manufacturing process, this minimizes the negative impact of heat on the strength properties of steel profiles. A computer-controlled arm with a laser head is used here for extremely accurate precision welding of profiles with a high-frequency laser beam.

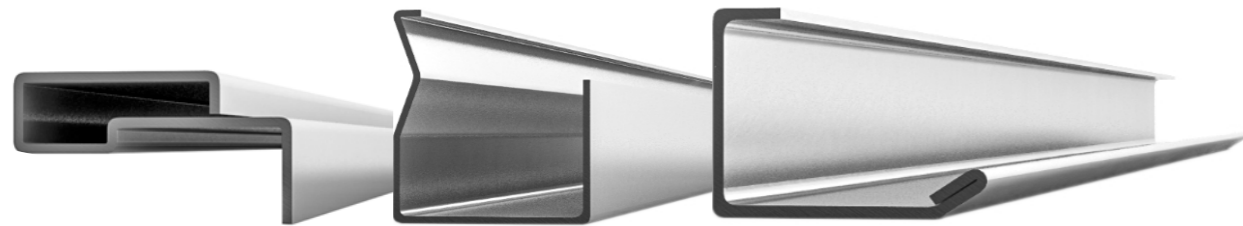

WINDOW AND DOOR REINFORCEMENTS

www.landsberg.pl/en/offer/

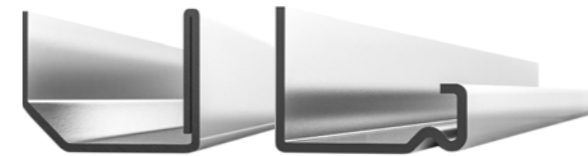

Window and door sections for joinery, i.e., PVC windows and doors, showcases and glass façades according to the models of all popular system providers.

 **STAHLBERG**
ROOFS AND FACADES

www.stahlberg.pl

Knowledge and technology in the field of cold forming has been developed in the **STAHLBERG** brand.

High-quality products, available in many colours, are appreciated by customers and roofing companies. The factory in Wolental has 9 lines and machines for profiling STAHLBERG coated sheets.

+400 roofing variants

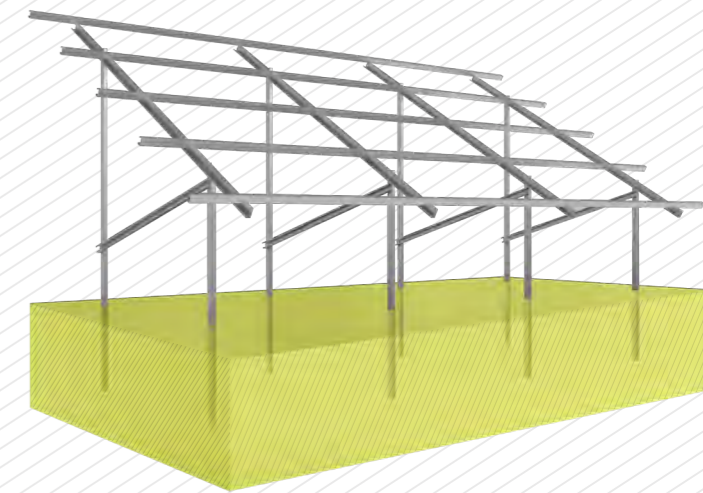

For 10 years, the following roofing and façade claddings have been produced successfully:

- ✓ custom-made trapezoidal sheets
- ✓ classic and modular metal roofing
- ✓ roof and façade panels
- ✓ flashings

 **SUNBERG**
CONSTRUCTIONS

www.sunberg.eu

The **SUNBERG** brand specializes in ground-based photovoltaic structures, which are designed and manufactured according to orders of photovoltaic farm investors.

The SUNBERG brand offer includes certified ground-based and roof support structures for photovoltaic panels. The tables produced in a vertical and horizontal arrangement are easy to assemble and universally applicable, including bifacial panels.
